[Wash Runner](#)

A Software Engineering company specializing in creating visually appealing and intuitive user experiences.

Software Engineering Applications

Minimalist Portfolio - Front End Engineer

Next.js, CSS Modules, TypeScript, Mobile-First Workflow

[Github](#) | [Live Site](#)

A responsive minimalist fake portfolio website

- Developed a minimalist online portfolio using Next.js, Typescript, and CSS modules.
- Implemented form validation and navigation features.
- Leveraged a mobile first workflow with grid and flexbox for responsive layout design.

Cultivate - Full Stack Engineer

React, Hooks, Bootstrap, Express, Docker, Google Cloud

[Github](#)

Health/Fitness application that allowed users to design/reach their health goals

- Successfully led a team of 7 developers in the end-to-end development of a full stack application.
- Developed React components that utilized a 3rd party API and HTTP methods (e.g., GET, POST) to retrieve and update data from a database.
- Implemented Hooks and Bootstrap for functional and responsive design.

Project Catwalk - Full Stack Engineer

React, Hooks, Node, Express, REST, API, AWS

[Github](#)

E-commerce shopping application experience

- Implemented RESTful API and Express framework for server-side functionality.
- Utilized AWS cloud services for application hosting and deployment.
- Created reusable components such as cards, headers, and interfaces to display reviews, products, and image carousels.

Education

Hack Reactor - Software Engineering Immersive

Mar 2021 - Dec 2021

Los Angeles, CA
